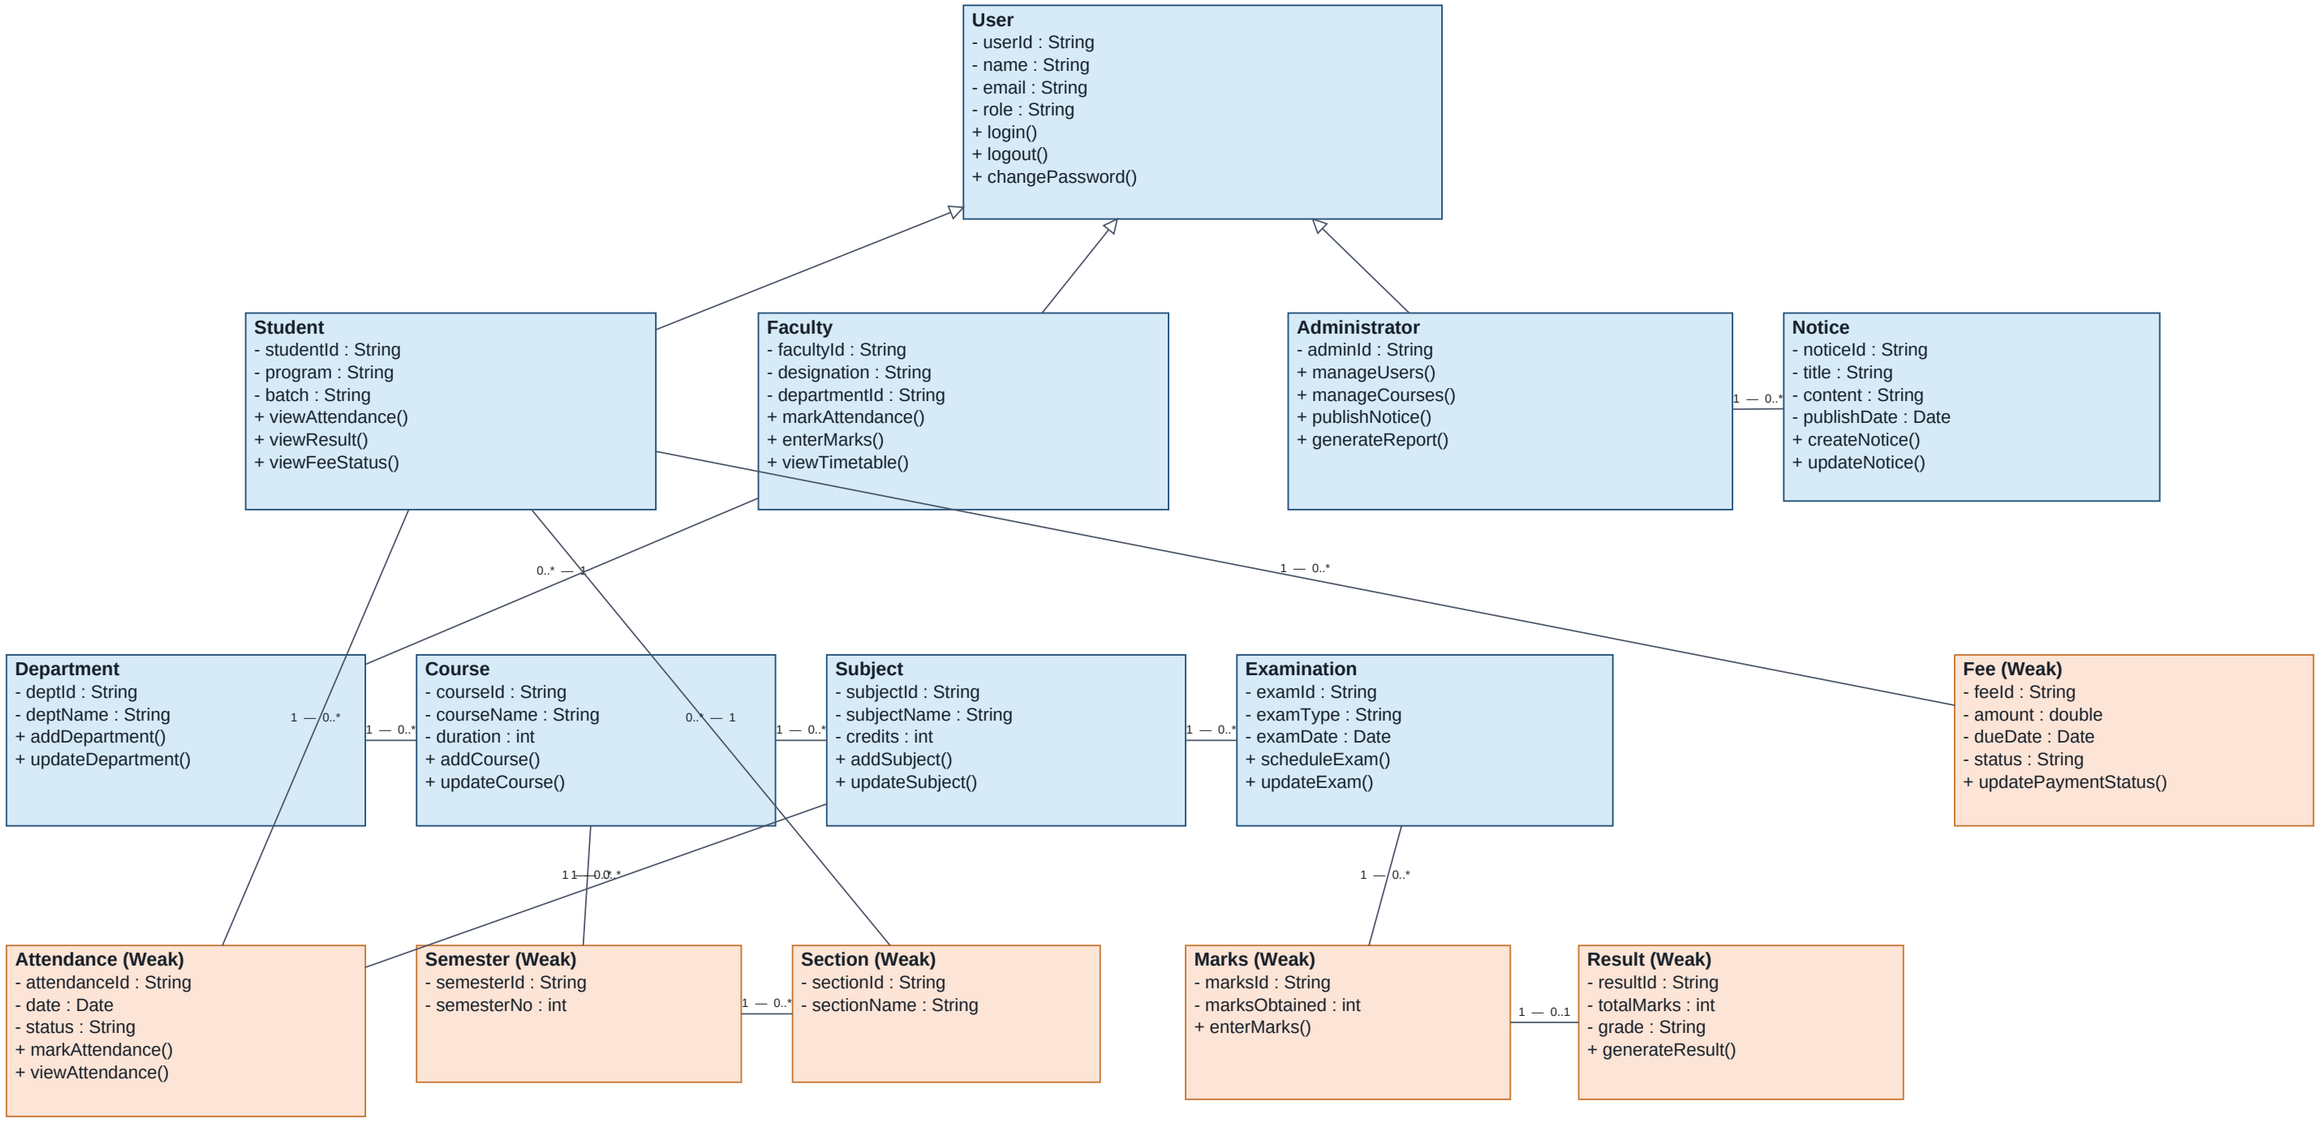
KIET COLLEGE ERP PORTAL — UML CLASS DIAGRAM

Blue = strong/core classes | Orange = weak/dependent classes



Class Classification
Strong / Core: User, Student, Faculty, Administrator, Department, Course, Subject, Examination, Notice

Weak / Dependent (project-level classification): Semester, Section, Attendance, Marks, Result, Fee

Note: Weak/strong is used here as a conceptual project classification. In strict UML, classes are not formally labeled weak/strong; dependency is shown through associations.

Editable Draw.io diagram — open with diagrams.net (draw.io); boxes, connectors, labels, and classification note can be changed.
