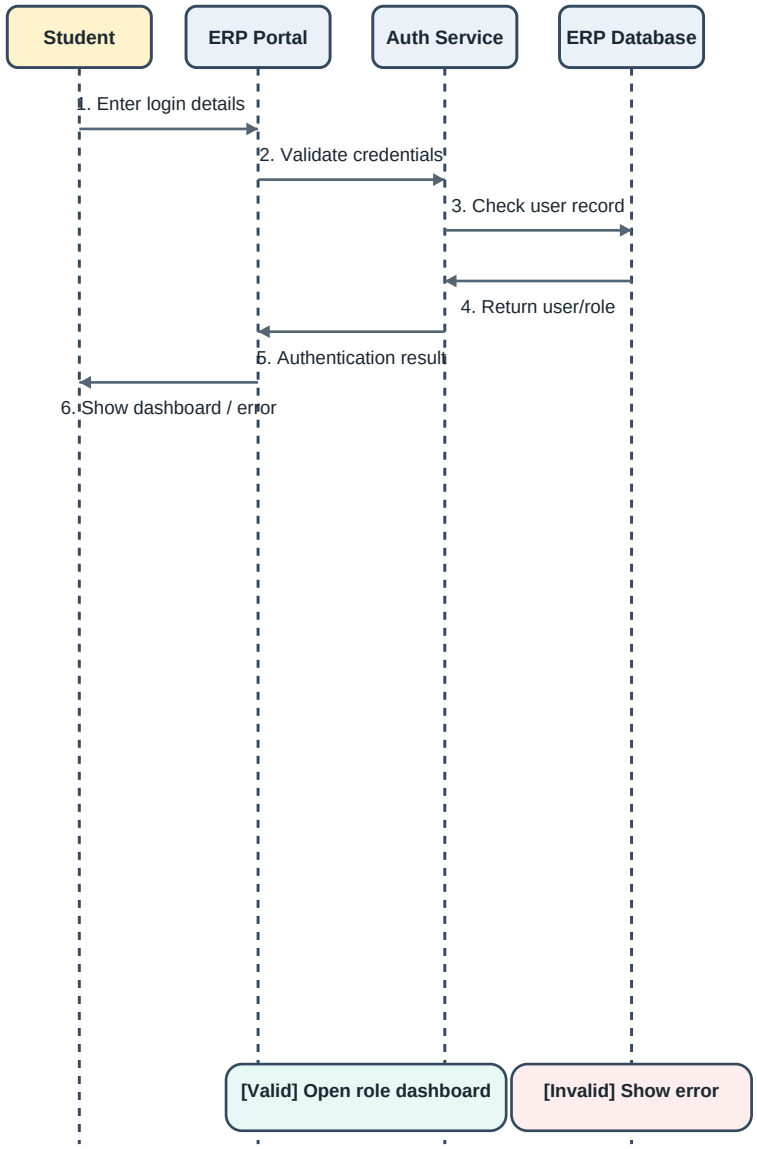
KIET College ERP Portal

Sequence Diagram — Student Login (UC-01)



Sequence shown for the Student Login use case (UC-01) from the SRS.

Flow: Student enters credentials → ERP Portal requests validation → Auth Service checks the user record in the database → the portal shows the dashboard if valid, otherwise an error message.

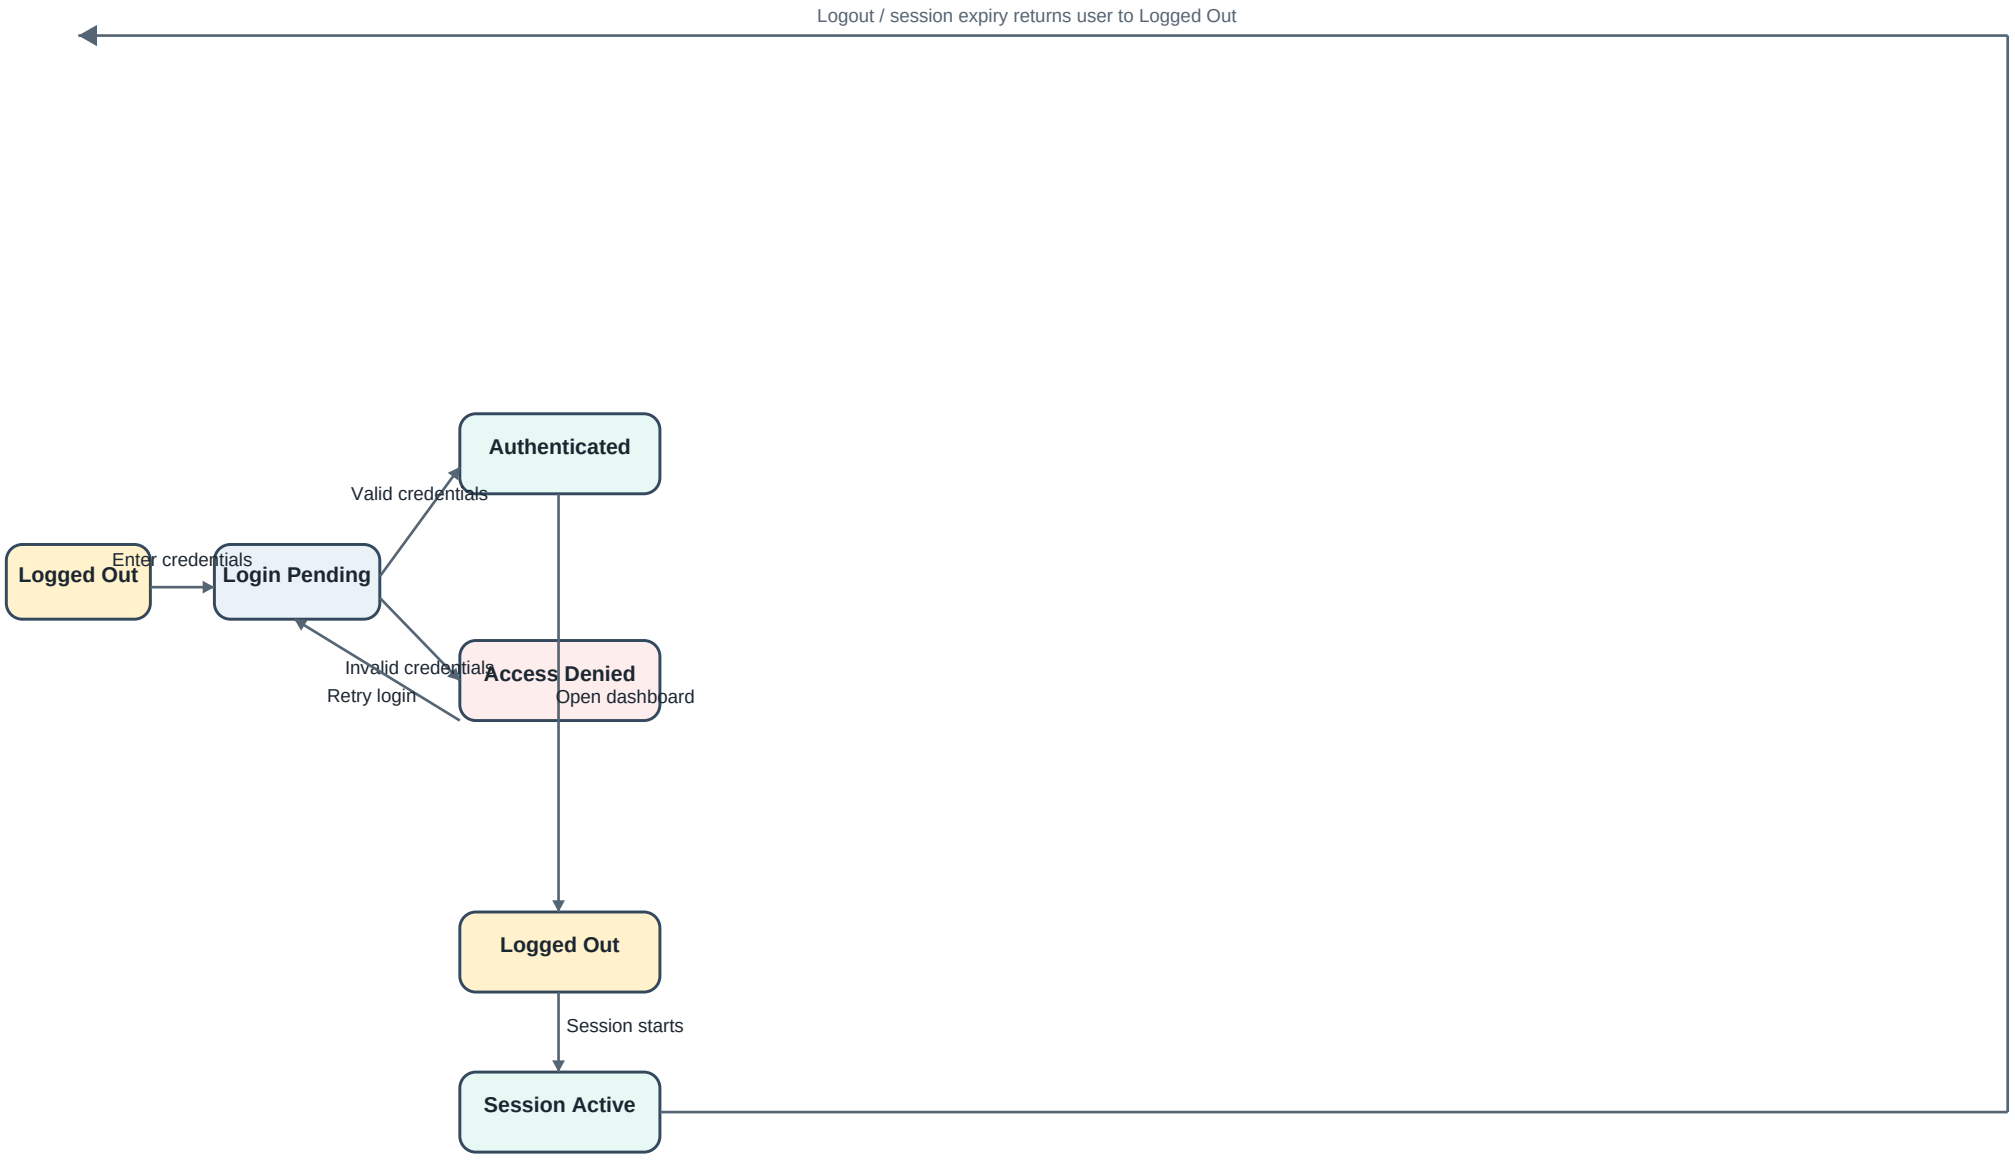
State Transition Diagram — Login & Session



State transitions model the authentication/session lifecycle described in the SRS.

States: Logged Out, Login Pending, Authenticated, Access Denied, and Session Active. Valid credentials allow access; invalid credentials show denial and allow retry. Logout or session expiry returns the user to Logged Out.

Prepared according to the SRS authentication, role-based access, and logout requirements.
